

HCA Data Portal Page checklist v1.0

Following the approval of an Atlas by the HCA Organizing Committee, the HCA executive office will ask the relevant Biological Network coordinators to provide the following information so that the Atlas can be published on the HCA Data Portal:

- Updated Biological Network Description
- Confirmation of dataset lists in the HCA data repository and links to CELLxGENE and other portals
- Information on any “component” or sub-atlases or superclusters (matches the organization of the CELLxGENE page)
- Links to publications and code
- Name of the “Integration lead” for technical questions
- Atlas highlights (three or four highlights: *i.e.*, number of new cell types, novel data types, etc)
